

GEL SPA™

REJUVENATING GEL FACIAL MASQUE

DIRECTIONS FOR USE:

1. Wash face.
2. Apply masque according to directions.
3. Remove masque after use, recover, roll and return to tube until next use.
4. After several uses, it may be necessary to clean the masque by gently washing the surface of the masque with a lightly dampened soft cloth. Do not saturate the masque, just swipe dampened cloth over the surface. Wait 60 seconds after cleaning before recovering, rolling and returning to the tube.
5. The masque may be trimmed to size. Leave clear plastic cover on while cutting.
6. For optimum results, we suggest applying Stimulen™ Collagen Lotion after use.
